At the International Conference on "Semiconductor Materials Packaging, AI & ML, Reconfigurable VLSI Architectures based IoT & Future Communication Technologies" (SMART 2024), we are committed to upholding the highest standards of integrity and ethical conduct in the publication of our conference proceedings. We expect all authors, reviewers, and editors involved in our publication process to follow the ethical guidelines below, ensuring the credibility, reliability, and academic integrity of the work presented.

## **Authors' Responsibilities**

- 1. **Originality and Plagiarism:** Authors must ensure their work is entirely original, with proper citation for any sources or influences. Plagiarism in any form is unethical and unacceptable. The maximum allowable plagiarism level is less than 10%.
- 2. **Acknowledgment of Sources:** Proper acknowledgment must be given for the work of others. Authors should cite all publications that have influenced the development of the reported study.
- 3. **Authorship of the Paper:** Authorship should be limited to those who have made significant contributions to the conception, design, execution, or interpretation of the study. All those who have contributed should be listed as co-authors. Those contributing in a more limited way should be acknowledged or listed as contributors.
- 4. **Disclosure and Conflicts of Interest:** Authors must disclose any financial or other substantive conflicts of interest that could influence the results or interpretation of their manuscript. All financial support sources for the project should be disclosed.
- 5. **Data Access and Retention:** Authors should be prepared to provide raw data for editorial review and, where feasible, make it publicly accessible. Data should be retained for a reasonable period post-publication.
- 6. **Reporting Standards:** Authors should provide an accurate account of their research and an objective discussion of its significance. The data should be presented accurately, and the paper should include enough detail and references to allow replication of the work.
- 7. **Multiple, Redundant, or Concurrent Publication:** Authors should not submit manuscripts describing essentially the same research to more than one journal or primary publication. Submitting the same manuscript to multiple outlets concurrently is unethical.

## **Reviewers' Responsibilities**

- 1. **Confidentiality:** Reviewers must treat manuscripts as confidential and not share or discuss them with others unless authorized by the editor.
- 2. **Acknowledgment of Sources:** Reviewers should identify relevant published work that the authors have not cited and should alert the authors if similar work has been reported elsewhere.
- 3. **Standards of Objectivity:** Reviews should be objective and devoid of personal criticism. Reviewers should present their opinions clearly, with supporting evidence.
- 4. **Promptness:** Reviewers who feel unqualified to review a manuscript or unable to do so promptly should notify the editor and excuse themselves from the process.

5. **Disclosure and Conflict of Interest:** Unpublished materials from submitted manuscripts must not be used in a reviewer's own research without the author's explicit consent. Confidential information gained through peer review must not be used for personal benefit.

## **Editors' Responsibilities**

- 1. **Publication Decisions:** The editor is responsible for deciding which articles to publish in the conference proceedings. This decision should be guided by the validity and relevance of the work for the scientific community.
- 2. **Fair Play:** Manuscripts must be evaluated solely based on their intellectual content, without regard to the authors' race, gender, sexual orientation, religious belief, ethnicity, citizenship, or political affiliation.
- 3. **Confidentiality:** The editor and editorial staff must not disclose information about a manuscript to anyone other than the corresponding author, reviewers, potential reviewers, or relevant editorial advisors.
- 4. **Disclosure and Conflicts of Interest:** Unpublished material disclosed in a submitted manuscript must not be used in the editor's research without the author's written consent. Privileged information obtained through peer review must be kept confidential.

By adhering to these ethical guidelines, SMART 2024 seeks to uphold the integrity and quality of its conference proceedings, fostering a culture of trust, respect, and academic excellence.
